EXPERIENCE

Data Analyst Intern — *Retail Data Analytics Lifecycle* **January 2026 – April 2026**
Tools Used: Excel, SQL, Power BI

- This project demonstrates a complete, company-level data analytics lifecycle aimed at understanding customer shopping behavior for a leading retail company. The analysis helps the business optimize its marketing strategies, improve customer engagement, and drive repeat purchases by uncovering patterns across demographics, sales channels, and promotional activities.
- Designed and maintained production-ready Power BI dashboards tracking core business revenue drivers, channel volumes, and subscription conversions for cross-functional business units.

PROJECTS

Predictive Diagnostic and Clustering Pipeline — *Python, Scikit-Learn, NumPy* **March 2026 – April 2026**

- Ensemble Learning & Unsupervised Partitioning: Aggregated base models into parallel and sequential ensemble frameworks (Random Forest/AdaBoost) to establish strict feature importance rankings; partitioned unlabeled data structures into optimized spatial groups using centroid and density-based clustering models (K-Means/DBSCAN).
- Designed and maintained production-ready Power BI dashboards tracking core business revenue drivers, channel volumes, and subscription conversions for cross-functional business units.
